

Irisys Implements VisionTime

Thermal Kinetics

the coolest technology
in people counting

Irisys has introduced the VisionTime system at their Northampton facility .

Irisys (Infrared Integrated Systems) Ltd, is the largest global provider of People Counting and real time Queue Management solutions.

Irisys is one of a growing number of IT sector companies to appreciate the power of the VisionTime system.

One of the aspects of our system that most impressed, was the facility to allow their employees to make electronic requests at PCs for changes to time and absence records, which would be signed off “electronically” by up to Supervisors.

The facility to use the system for checking who is in or out at times of emergencies was also considered important.

Objectives

- Offer flexible working hours
- Automate leave requests
- Access to staff cover reports

Why FlexTime

- Time and Attendance experience
- Excellent references

Results

- Improved staff work/life balance
- Reduced employee stress
- Numerous reports available

In recent years Irisys has also expanded to offer a range of Smart Building management and Security solutions.

RESULTS

VisionTime Workflow

Employees can use this self-service electronic update feature in VisionTime when looking for time off or to have an illness or lateness excused. The supervisor approves the requests electronically, thereby eliminating paperwork. The system sends an automatic email to supervisors reminding them of any outstanding requests.

Staff can check their time folders to see the status of the request and can also receive an automatic email alert when the request has been accepted.

VisionTime Flexible Working

The system calculates the employee's time balances so they are always aware. This helps with decisions as to when to take time off. Employees can also see their colleagues' current and future work and leave schedules which may influence the decision as to which day to take off.

Who's In?

VisionTime operates in real-time. This means that reports of who is in or out can be called up from anywhere in the network with instant effect. This can assist with emergency drills or simply to let the switch board operator know if an employee is currently at work.

Fluke Corporate

Irisys is part of the The Fluke Corporation who also use VisionTime at their Norwich facility. **Fluke** is the world leader in the manufacture, distribution and service of electronic test tools and software.

Founded in 1948, Fluke provides testing and troubleshooting capabilities that have grown to mission critical status in manufacturing and service industries. Every new manufacturing plant, office, hospital, or facility built today represents another potential customer for Fluke products.

From industrial electronic installation, maintenance and service, to precision measurement and quality control, typical customers and users include *technicians, engineers, metrologists, medical-device manufacturers, and computer network professionals.*
